

Fixx USD (FXUSD) Whitepaper

Digital Stablecoin Infrastructure Built on Polygon — fixxusd.shop

1. Introduction

FXUSD is a blockchain-based digital currency project designed to provide a fast, transparent and accessible digital payment ecosystem, built on Polygon using the ERC-20 standard.

2. Vision and Mission

To build a digital currency infrastructure connecting blockchain payments, DeFi, digital wallets, Web3 applications and financial services, with a focus on transparency and usability.

3. Blockchain Technology

Transactions are recorded on a public blockchain and can be verified by anyone. Users sign transfers in their own wallets; FXUSD Hub never holds private keys.

4. Polygon Network

Polygon PoS (chain ID 137) offers fast confirmations and low network fees. Contract: 0xa1760B60625eac39f672187a510185B2B3914624 (source code verified on PolygonScan).

5. Token Utility

Digital transfers, payments and settlement within the FXUSD ecosystem and integrated Web3 applications. Target reference value: 1 FXUSD = 1 USD. This is a goal, not a guaranteed market price or redemption promise.

6. Tokenomics

Name: Fixx USD. Symbol: FXUSD. Decimals: 18. Fixed maximum supply: 900,000,000 FXUSD. Proposed allocation (plan, not on-chain): Liquidity 40%, Ecosystem 25%, Development 15%, Partnerships 10%, Reserve 10%.

7. Roadmap

Phase 1 Foundation: token creation, contract deployment, website (done); initial liquidity. Phase 2: wallet integrations, payment infrastructure, community, documentation. Phase 3: exchange integrations, Web3 partnerships, global adoption.

8. Security

Contract source code is publicly verified. An independent security audit, legal review and reserve attestations are not yet completed; status is published at fixxusd.shop/transparency.

9. Founder Information

Dragan Kacar — Founder & CEO of Gate Networg doo Ptuj, Founder & Project Lead of FXUSD. IT entrepreneur and blockchain developer. LinkedIn: linkedin.com/in/dragan-kacar-731292267 · X: x.com/DraganKacar199 · Telegram: t.me/FIXXUSD · info@fixxusd.shop

10. Future Development

Expanded liquidity, independent audit, payment and merchant integrations, mobile wallet support and listings on market data platforms.
